Operations & Data Analytics Professional | Power BI · Python · SQL

PROFILE

Operations professional at Namariq Arabian Services, leading a three-person Front Desk team within a large-scale residential facility. Progressed from daily operations into applied analytics and reporting improvement — building consolidated reporting workflows, revenue dashboards, and rate analyses for the Sales Department — while completing a B.Sc. in Data Science & AI (SEU, expected 2027). Works hands-on with Power BI, Python, SQL, and Excel.

SELECTED IMPACT

30K+ Operational Records Analyzed | 24-Company Reporting Workflow | 27 Budgettr Users | 5,000-Resident Operation

PROFESSIONAL EXPERIENCE

Namariq Arabian Services Co. — Yanbu — Front Desk Group Leader 2024 – Present

- Built a linked Excel workflow that consolidates operational data from 24 companies into a one-click summary, and improved Daily Revenue reporting with a monthly dashboard giving management a full-month view at a glance.
- Developed the Sales Department's average-rate-per-category analysis and redesigned Dining reporting templates to simplify data entry and improve readability.
- Lead and train a three-person Front Desk team and coordinate across departments within a residential operation with capacity for up to 5,000 residents.

Namariq Arabian Services Co. — Yanbu — Front Desk Staff 2023 – 2024

- Managed daily reservations, check-ins and check-outs, and guest-related records and documentation.

DATA & ANALYTICS PROJECTS

Camp Operations Dashboard — Power BI, Python, SQL — in production use at Namariq 2025

- Consolidated 12 monthly operational spreadsheets — a full year of data, ~30,000 rows × 14 columns — into one analysis-ready dataset using Python and SQL, then built a Power BI dashboard covering revenue, beds, occupancy, and category averages by quarter.
- Used by the operations team: the analysis surfaced the operation's peak season (October-January), revealed bed-based contracts as the highest-revenue contract type, and confirmed 1X6 as the top income-generating category.

Budgettr — personal finance web app — live at budgettr.com 2026

- Independently designed, built, and launched a bilingual Arabic/English budgeting app (React, TypeScript, Tailwind, PostgreSQL) covering monthly budgets, transactions, bill reminders, and savings goals — now serving 27 users.

Coffee Shop E-commerce Platform — client project 2026

- Built a full-stack storefront and admin panel for a coffee shop client — catalog, cart, and checkout for customers; 30-day sales, VAT reporting, inventory alerts, branch management, and an activity log for the owner.
- Designed the database schema and UI, and containerized the system with Docker for portable deployment.

TECHNICAL TOOLKIT

Data & Analysis: Python (Pandas, NumPy, Scikit-Learn) · SQL · Power BI (DAX) · Excel (advanced formulas & dashboards) · Data Cleaning & Visualization · Model Training

Development: JavaScript · TypeScript · React · Node.js · PostgreSQL · HTML/CSS · Astro · Docker · Figma · AI-assisted development

Professional: Team Leadership · Cross-Functional Coordination

EDUCATION

B.Sc. Data Science and Artificial Intelligence — Saudi Electronic University (SEU) Expected 2027

Diploma, Computer Programming — Technical and Vocational Training Corporation (TVTC) — GPA 4.57/5.00 2023
